Across the country, a heritage of southern Africa, the peninsula is a part of the Cape Floral Region, considered to have the most diverse range of plant life in the world. On the foot of Table Mountain, you can find the Table Mountain National Park, which is home to the Cape Gruvenpik. The park spans more than a mile. Twice the height of Niagara Falls, mighty Victoria Falls casts a veil of water over the Zambezi River, which is the third-longest river in the world. "Discovered" in 1855 by Dr. David Livingstone, the falls are considered to be the most powerful waterfall in the world. The falls’ name, Mosi-oa-Tunya, means "the smoke that thunders."
